

# Experiences with stakeholder involvement processes in the pilot area Bavaria

**Gerhard Haimerl, Bayerische Elektrizitätswerke  
Stefan Witty, CIPRA Germany**

**Final Conference, Sonthofen, 21.05.2015**

Two stakeholder groups with different interests:

- hydro power plant operator BEW
- nature conservation organisation CIPRA

**BEW**

*Bayerische  
Elektrizitätswerke*

**CIPRA**  
**LEBEN IN  
DEN ALPEN**

## CIPRA:

- Public funding by Alpine Space vs. legal obligation of plant operation?
- Sufficient possibility of participation for NGOs concerning objectives and content?
- Fear of misuse

## BEW:

- Real interest of NGOs in cooperation or just political positions?

- Meetings and workshops, e.g. CIPRA (Nov. 2013 in Munich)
- Feedback on tender documents and work plan
- Intensive integration of fishery authority by BEW
- Acceptance of fishery authority as “agent” of nature conservation concerns by CIPRA

Simple – essential – crucial:

- Cooperation needs communication
- Cooperation needs time
- Cooperation needs confidence

Schedule enough time in joint projects for sufficient cooperation!

Create confidence with joint projects!

# Thank you
